My Classes:

Go Game 围棋

I've been playing Go for ten years, and I first learned right here at ICCCI under the former Go teacher. My most notable achievements include winning the North American AGA Girls Cup two times. I hope to share my love of Go and our Chinese culture!

Math Grade 3-5

I have experience peer tutoring math both in high school and outside of school, and I've also helped organize and write problems for elementary and middle school math competitions. I'm excited to continue sharing my passion for math with my students!

About me

I'm 17 years old, and this will be my third year at ICCCI!

Besides from Go, I like playing pickleball with my mom and listening to music.

围棋课 ≠ 数学课
